

# Weekly Report 10

Jeremy Lachowicz

4/2/2022

## 1 Accomplished this week

I finished coding the indicators of style from Dr. Berenson. Then, I developed a method of combining the best Word2Vec and the best Doc2Vec models to create an even better model. I also tried different preprocessing iterations to determine which one was the best/worst. Finally, I wrote an early draft of my final paper.

## 2 Accomplish next week

I will finally get to testing the Hebrews data and continue to write and improve my final paper.
